Thanks, Kevin. I've been on a Chemours call all morning (referral coordination) and am thinking we need to do a bit more coordination in-house so I wanted to talk to you guys first. Jackie Clark suggested we add her and Jennifer Wilson. HQ also wants to join, but I'm thinking we should talk at the staff level first and then have another call with HQ. Does that sound good to you guys? If so, I'm going to schedule something for next week.

Thanks,
Pam

Pam, I haven't been on the last two calls we've had with Chemours because I've been out of the office. They're still addressing the areas of concern that we outlined last year. Ex. 5 AC/DP

Ex. 5 AC/DP

Ex. 5 AC/DP

We're trying to get a meeting on the books with them now.

Andrew Hartten (of Chemours) had to cancel our next meeting due to travel but he suggested having an in-person meeting. We had an in-person meeting in 2017 here in Philadelphia to expand the geographic areas in which they were working. I've attached the most recent data that we received from Chemours.

We'd be happy to sit down and talk to you about what's going on. I'm sure Roger has a better idea since he's been on the last two calls.

What is the status of the private well contamination from this site. Do they still have an issue and what's the extent. Can we sit down and talk about other potential problems when you guys get a chance?

Thanking you,
pam
